# Civil Engineering Geology Lecture Notes

**department of civil engineering - ace-edu** - objective of engineering geology lab to understand the role of geology in the design and construction process of underground openings in rock. to apply geologic concepts and approaches on rock engineering projects. to identify and classify rock using basic geologic classification systems. **chapter i : scope of engineering geology** - engineering geology forms the bridge between geology and engineering. it is mainly concerned with the application of geology to civil and mining engineering practice. the purpose is to ensure that geological factors affecting the planning, design, construction and maintenance of engineering works, and the **engineering geology as an interdisciplinary field** - to practice in environmental or engineering geology. the civil engineer should have at least one course in geology that provides familiarity with the basic earth materials, processes, an awareness of change through time, and ideally how this knowledge applies to the success of an engineering project. **popularizing geological education among civil engineering ...** - engineering geology is an applied specialty of geology that interlinks geology with civil engineering. its task is to analyze and solve geology problems related to human activities and human engineering (i.e., engineering geology problems) using principles and methods of geology and knowledge of civil engineering and mathematical mechanics. **jan valenta - geology** - aau 2013 janlenta@fsvut engineering geology - attaining the aims engineering geologists think in „mass“ way: the ground mass is the volume of ground which will be affected by **importance of geology in construction and prevent the hazards** - civil engineering projects is known as geological engineering or engineering geology (2). engineering geologists are needed wherever an understanding of rock properties and geological structures is required, i.e. road construction, building foundations, dam construction etc (3). the local geology of an area is important when planning a major **civil engineering (civil /environmental and geology) sl ...** - civil engineering (civil /environmental and geology) sl subject code name of the subject 1 14phd cv 001 transportation and highway technology 2 14phd cv 002 structural engineering 3 14phd cv 003 hydraulics & water resources engineering 4 14phd cv 004 geotechnical engineering **civil engineering - mnsu** - accreditation. the civil engineering program is accredited by the engineering accreditation commission of abet, abet. \_\_\_\_ civil engineering, as defined by the american society of civil engineers, is a profession in which a knowledge of the mathematical and physical sciences gained
